Social Work in the CMP Primary Care Setting

The CMP Social Work team supports your patients by helping them attain their goals for living and they will be happy to speak with you and your patients at your request. If you and your patient feel that a social work consult is helpful, our team can have additional conversations with your patient about their needs.

Our team remains up-to-date on community resources and how to access and pay for them. We help your patients identify their strengths and barriers, and connect them with resources that can help them meet their goals.

We support your efforts, and provide your patients with assistance in various areas, including :

A Higher Level of Care – Are they considering senior apartment living, assisted living, or require full-time care in a skilled nursing facility?

Support in the Home – Is their goal to remain safely at home, but require a little extra help such as home delivered meals, life alert system, transportation, or an aide to help them meet their needs? Are they currently receiving services from any other agencies?

Financial/Insurance – Do they have questions about Medicare, Medicaid, other insurances, or how to pay their co-pays?

Palliative Care – Have you had a discussion with your patient about symptom management, and now they would like to speak with someone about how to get the additional support/care that they need?

These are just a few ways that we can help support you and the care you provide to your patients.

Give us a call or fax us a [referral](#), we are happy to help.
With your patient's consent, we will offer resources and support over the phone,
or during a home or office visit.
