BEHAVIORAL HEALTH FACILITIES

CATHOLIC MEDICAL PARTNERS

Catholic Medical Partners is an organization committed to helping our members provide quality, patient-centered care. We bring together the people, technologies, facilities and ideas that help our more than 900 primary care physicians and specialists, along with our hospital partners and other clinical professionals, work together to ensure that each patient gets the care they need and the compassion they deserve. When a patient's care needs change, we want you to have the resources to address their needs and to coordinate their care, whether in a physician's office, hospital, or another healthcare setting. In keeping with that approach, Catholic Medical Partners has developed partnerships with some of Western New York's leading behavioral health providers, including:

- **Horizon Health Services** p.2
- **Spectrum Health & Human Services** p.17
- **Catholic Charities – Monsignor Carr Institute** p.24
- **Catholic Health** p.32

These partnerships help strengthen our collective ability to care for your patients mind, body and spirit. It's more than a referral, it's a promise to change the way healthcare works in our community.

HORIZON

Our mission: Together for Recovery. Changing Lives. Saving Lives.

Horizon Health Services is a not-for-profit organization in Western New York that provides an array of inpatient, residential and outpatient treatment and support services for individuals and their families dealing with substance use and/or mental health disorders. Among one of the largest treatment providers in WNY, we have 25 locations across Erie, Niagara and Genesee counties. We work together with multiple stakeholders utilizing a highly trained and dedicated care giver team. We are focused on the delivery of quality, effective, and empathetic services to those in need. For more than 40 years, Horizon has been committed to being progressive and independent, and to seek out the best clinical and operational practices, emerging technologies and new strategies to help patients and their families.
